

God's Creation World

It is actually not necessary to explain the art works, because they witness God's creation world by themselves. If I would have to explain my art works, God's creation world is One and Communion. This art consists of three different worlds (Triptych): Cosmic world, virtual world, and Transcendental world. They are composed of 8 modules in each world and total of 24 modules. Cosmic world expresses "the universe is one" through many holes in one expression of gravity. Virtual world expresses "the virtual and real world on one" through many kinds of abstract in expression of our reality being one illusion. Transcendental world expresses "everything is possible in God's World and God's Spiritual world is one" through a big round in one total field. This works are colored in only white, for expressing the ultimate dimension of God's Creation. I would like to invite all audiences into the white color fields for experiencing the ultimate Space, by ceasing daily conscience of reality.
